How to become a 10 MD member?

## Purpose

There was an unthinkable idea, which seemed impossible for most of them. Some said it's deadly hard. And still, some will keep saying it is not possible. The truth is, we are still working on it and we want you to join us on the journey.

The idea which we fall in love with is to earn 1-10% every day. But, we mean every day! Without losing any day in a year. Besides, nobody will have to check the market, where it's going? Nobody will even ask "What's the trend?". Without calculating anything, we plan to earn money every single day.

Trading bots are the future of next markets. Even though there is no one in the world that accomplish our goal. The goal is to become pioneers of the world in this topic.

It's started on March 2020 and we spent a lot of time until now, yet it's not enough for TBOT.

What is TBOT? TBOT is an auto-trading algorithm which contains complex structures for better understanding of the market and improving trading strategy continuously. We call it TBOT because it is a trading robot that reads the crypto market, calculates all of the possibilities and executes trades just within 30 seconds in every single quarter of an hour. Don't ask for algorithm and source code because it's complicated and it's our 10 Million Dollar secret.

We come to a point where we have trust in our TBOT and decided to share with community.

It still has ups and downs but it's about to come to the point where we are desiring. Small fractions are only things that are pulling us back. That's why we need to have early investors. Because, we are going full time on our precious TBOT. Check "Road Map" for details.

If you believe what we believe, then come and join us in 10 Million Dollars Club.

## Team

Anonymity is curial for us right now, since the business is vulnerable. And, we don't want to deal with Social Media attacks. But, in the future we are planning to reveal ourselves to community as the business and crypto world becomes legislated.

## NFT

If you know what is NFT, skip the video. If you don't know, please click below link and watch the video.

<https://www.youtube.com/watch?v=Oz9zw7-vhM>

10 Million Dolarres NFT's are created in order to use blockchain technology. In the video you'll see about many topics but not finance, since most of the people won't realize to use it to serve cash flow like us. Our NFTs supply cash flow and maintain its real value by storing and trading real crypto assets.

AVAX Network is the least energy consumption blockchain network, unlike Ethereum. Avalanche network is also the least expensive, the fastest and the most secured when compared rest of the blockchains. You can make your research if you don't believe us.

Cash Flows Smart Contracts will be directed to regarding NFT(s).

**Important: Keep you NFT(s) in your AVAX Wallet in order to receive Cash Flow. If you exclude your NFT(s) from wallet, make sure you sold it other people.**

## Cash Flow

There will be Cash Flow for each NFT on monthly basis. 1st of each month profits will be deposited to NFT's holders' wallet.

Mechanism is to keep 50% Monthly Profit in the TBOT's trading Wallet. 50% of monthly profit will be divided into two which 25% deposited to NFT holders and other 25% will be deposited to developers.

This method will increase the actual value of NFT and will supply cash flow regularly.

When each NFT will worth at least 10 Million USD, 100% of the monthly profit will be shared as dividend between NFT holder (50%) and Developers (50%).

In case of a loss in a month, there will be no cash flow. All amount in the fund will be transferred to next month's initial fund.

**Important:** This example does not represent actual income, it only shows how mechanism works.

Month	Initial_Funds	Monthly_Return	Profit_USD	NFT_Cash_Flow	Trasfered_Funds
January	\$ 100,00	10%	\$ 10,00	\$ 2,50	\$ 105,00
February	\$ 105,00	10%	\$ 10,50	\$ 2,63	\$ 110,25
March	\$ 110,25	10%	\$ 11,03	\$ 2,76	\$ 115,76
April	\$ 115,76	10%	\$ 11,58	\$ 2,89	\$ 121,55
May	\$ 121,55	10%	\$ 12,16	\$ 3,04	\$ 127,63
June	\$ 127,63	10%	\$ 12,76	\$ 3,19	\$ 134,01
July	\$ 134,01	10%	\$ 13,40	\$ 3,35	\$ 140,71

December	\$ 171,03	10%	\$ 17,10	\$ 4,28	\$ 179,59

In this example, one NFT-Circle0 will bring 39,79 USD (39,79%) cash Flow + NFT's actual value which is 179,59 (79,59%)

Total value of an NFT will be 219,38 USD (119,38%) at the end of a year in case for monthly 10% return.

## Risk & Opportunities

TBOT NFTs are assets for investment purposes.

We do not promise any guarantee on the project, because we are the first ones that are trying to earn some amount every day. But, we can only promise you that we will try our best.

“Cryptocurrencies are high-risk, unstable investments that could result in devastating losses just as quickly as they can provide gains,”

At the end of each defined period, investor can earn a return or inflict a loss, it's on the investor.

If there is a loss at the end of the defined period, the next period starts with the remaining balance. In the case of making a profit, the profits are distributed to the investor using previously agreed methods and rates.

We do not obligate any risk of losses. Investors take their own risk. Invest only with the amount that you're willing to lose.
